

ENVIRONMENTAL IMPACT

Traveling Exhibition

Produced by David J. Wagner, L.L.C.

ENVIRONMENTAL IMPACT is a traveling museum exhibition produced by David J. Wagner, L.L.C., the purpose of which is 1.) to recognize, document, and share the work of leading contemporary artists who chose to focus their work on global as well as local environmental issues; 2.) to heighten public awareness and concern about the intentional or unintentional consequences of human action or inaction, through the power of this art. Traditional art generally depicts nature in all of its glory, often in beautiful, pristine conditions. The 75 paintings, photographs, prints, installations, and sculptures in ***ENVIRONMENTAL IMPACT*** are different than traditional works of art because they deal with numerous, ominous environmental issues ranging from the implications of resource development and industrial scale consumption, to major oil spills, the perils of nuclear energy, drought and diminishing water resources, global warming, and many other modern phenomenon that impact people and the other inhabitants which populate the planet today. To produce ***ENVIRONMENTAL IMPACT***, Curator David Wagner draws upon a diverse range of artists whose works are not only hard-hitting, but which also propel the Environmental Movement in the age we live in. These artists include:

EXHIBITING ARTISTS

Alphabetical by Last Name

Arnold, Chester, Sonoma, CA
Bateman, Robert, Fulford Harbour, BC, Canada
