# environmental IMPACT

Saturday, October 25, 2014 to Sunday, January 4, 2015

"Environmental Impact" includes 75 paintings, photographs, prints, installations and sculptures by contemporary artists who have focused their work on both local and global environmental issues. In his production of the exhibition, independent curator David Wagner sought to upend traditional depictions of beautiful, glorious nature in art; instead, "Environmental Impact" seeks to depict the ominous effects of resource development and industrial scale consumption.
